Letto by Felix Partner Furniture

Letto by Felix Partner bedroom furniture stands out with its captivating design which is inspired by the art of Japanese timber construction.

The construction system is as simple as it is refined, as it functions entirely without nails and screws. The elements are simply plugged together and in the case of Letto by Felix Partner they are fixed through clamps made of polished chrome steel.

The bed is manufactured manually in Switzerland and is made of beautiful, high-quality, European walnut solid wood and supplemented with components made of cool chrome steel. The result is a delicate and timelessly modern addition to any bedroom in 100 x 200 and 200 x 200 cm. It can function either as an eye catcher or for elegant restraint.

Some of the contents are also available in other languages:
